

Noni Can Help Your Pets Feel Better Too!

Have you discovered the healing benefits of 100% Pure Noni juice for your pet? Dr. Lindsey Duncan ND, CN, protégé of world renowned Natural Medicine expert, Dr. Bernard Jensen DC, PhD has!

Why is Noni good for us and our pets in so many ways? The answer goes back thousands of years, when Noni was known as the “Queen” of all the canoe plants (sacred plants that the Polynesians were required to take with them when they settled a new island) and can be summed up by the following points:

1. Noni contains over 140 powerful vitamins, minerals and other nutrients which are proven antibacterial agents and have shown to fortify and protect against many types of infectious bacteria.
2. Noni contains Damacanthal, which in 1993 Japanese researchers analyzed (among 500 different plant extracts) and concluded it has a very beneficial effect on precancerous cells.
3. Noni contains Scopoletin, which is known to bind with Serotonin, and demonstrates cardio-protective, anti-fungal, antihistamine and anti-inflammatory effects.
4. The Anthraquinones in Noni help stimulate activity of the entire digestive process, increasing secretion of enzymes and bile flow. Anthraquinones have also been shown to be effective for pain relief.
5. Noni is a powerful, digestive bitter, rich in natural enzymes which stimulate the digestive tract and promotes all around healthy digestion and is also very effective at helping to combat worms, parasites and more.
6. Noni juice has a very low PH of 3.4 to 3.8. It is acidic in nature, containing powerful antifungal, antiviral, antitumor and antihistamine properties.
7. Noni directly affects the cells and literally has the ability to open up the cell wall, allowing more nutrients to be absorbed into cells, and more waste material to be removed from weak or damaged cells.
8. Noni acts as a powerful catalyst with whatever nutrient you combine it with. It increases the power, availability, and effects of all other nutrients by improving absorption, function and overall results.

9. Noni has been used on the skin since ancient times for burns, abrasions, cuts, wounds and bruising by enhancing the healing process and helps to remove dead tissue quickly and safely so that new tissue may grow and flourish.

10. Noni helps to strengthen and support the immune system.

When combined with a proper diet and an active lifestyle for your pet, Noni100 can help to support and stimulate your pets self healing process through cell regeneration, nutrient intake, cellular and intestinal detoxification, digestive support and repair, balancing of PH, and utilizing the catalyst effects and specific and active compounds found in Noni.

How much Noni should I give my pet?

Dogs & Cats: 1 – 10 lbs: ½ ounce to 1 ounce per day
11 – 20 lbs: 1 ounce to 1 ¾ ounces per day
21 – 45 lbs: 1 ¾ ounces to 2 ½ ounces per day
46 lbs and above: 2 ½ ounces to 3 ounces per day

Small Pets: Noni100 is safe for birds, hamsters, pet mice, gerbils, etc.
Give between 10 – 15 drops per day.

Large Animals: Noni100 is also safe for larger animals, such as cows and horses. Start with 1 – 4 oz per day. Give an extra ½ oz for each 50 pounds the animal weighs over 250 pounds.
